

## **CURRICULUM VITAE**

### **Dr Mohamed Amir Shah Abdul Aziz, Malaysia**

He was a bright student at the Penang Free School and obtained a scholarship to pursue Medicine at the University of Leicester, United Kingdom. Upon graduation, he returned to Penang, and completed his internship and served as medical officer in various departments at the Penang General Hospital, where he found special interest in serving cancer patients. He then worked and pursued Clinical Oncology postgraduate training as a Specialist Registrar at The Christie Hospital in Manchester, United Kingdom, which is one of the largest cancers centers in Europe. He completed his training in the UK and obtained Clinical Oncology Fellowships from Royal College of Radiologists London and Royal College of Surgeons Ireland. Dr Amir then returned to Penang and served as Consultant Oncologists and Radiotherapists in Mount Miriam Cancer Hospital for 2 years. He joined Loh Guan Lye Specialists Centre as a Consultant Oncologists & Radiotherapist for a further 2 years. Dr Amir has a vast experience in the latest Radiotherapy treatment modalities, including IMRT, IGRT, SRT, SRS and Brachytherapy. He offers the latest evidence-based targeted therapies and chemotherapies to patients in order to enhance survival and optimize cure. He has been involved in many clinical trials, including Phase 1, 2&3 trials, conducted in Manchester as well as currently being a Principal Investigator for ongoing cancer trials in Penang. Dr Amir is registered as Specialist in Clinical Oncology with the National Specialist Register and is a Faculty Member of the College of Radiologists, Academy of Medicine Malaysia. He is also a member of the European Society of Therapeutic Radiation Oncology (ESTRO) and registered with the General Medical Council UK.
