

CURRICULUM VITAE

Dr Sunny Tan, Singapore

Sunny Tan is Senior VP of Invitrocue, a spinoff company of Singapore's Agency For Science, Technology and Research (ASTAR). Sunny is passionate about commercializing innovative technologies to improve healthcare, and has worked successfully with entrepreneurs, investors, senior executives, R&D teams, and governments to evaluate technologies and investment opportunities, and matched science to business. Sunny started his career at the National Science & Technology Board, Singapore, and subsequently held operational positions in American and Australian biomedical companies. He received his undergraduate degree in Biotechnology (First Class Honours) from the University of New South Wales, Australia, and his PhD in Biochemistry & Molecular Biology from the John Curtin School of Medical Research at the Australian National University.
